We set the trend for the health and awareness of beauty masters

HISTORY

Úlka Company Company was founded in 2017. Today, it is an international manufacturer of products for nail industry technicians, with more than 40 employees. And 6 years ago, it all started with one extract for manicure, created by the company's founder, Volodymyr Siletskyi, for a local nail master.

History in dates:

2017 Production of the first extract for manicure by the founder of the company, Volodymyr, for a nail master. Creation of a mini-production in a rented apartment.

2018 Active development, moving to our first manufacture with a space of 100m², increasing the staff to 10 employees. The first exhibition in Ukraine and the first international contract.

2021 Fast pace of development, the staff of the company has grown to 32 employees, the production area has been increased to 800 m².

2022 Participation in the first international exhibition in Poland. The sales geography of the products has expanded to 10 countries: the USA, Canada, Italy, France, Latvia, Lithuania, Estonia, Spain, Moldova, Israel, Ukraine.

In 6 years, our production has grown from 3 people working in a two-bedroom apartment and produced several extracts for manicure a month, to a modern company that produces a thousand units of products every month: hoods for manicures, accessories for nail artists, reusable and disposable face masks.

In 2023, we updated the company's values and mission - **We set the trend for the health and awareness of beauty masters.** Following our mission, we develop and produce unique products. The constant desire to move forward and create products of the highest quality leads to the fast development of the company. And we are also building the largest beauty factory in Ukraine.

Every year, our own research and design departments develop and bring new products to market, bringing us closer to our global goal. Among these goods are: the Úlka Premium manicure hood, which will allow you to keep the master's workplace clean without additional effort, because it absorbs 99.9% of dust.

One of the key values of the company is Service. Service for us is like a religion, which is supported and practiced by everyone in our team: from the production worker to the owners of the company.

Úlka has passed all stages of the inspection and received CE and ISO certificates confirming the level of quality and safety of the product.

We unlock new technologies, introduce new materials and create products that change the market and provide additional opportunities for manicure masters. Let's create a new beauty industry together!

face masks

EXPENDABLE MATERIALS

ÜLKA reusable face mask

The mask is made of foamed polyurethane, as dense as possible, so it does not let dust in and at the same time it is comfortable to breathe. The material stretches well without forming folds, fits tightly to the skin, repeating the contours of the face. The mask can be washed.

Hypoallergenic
Period of use: 2 months

Colors: 

ÜLKA carbon face mask

The mask is made of 2 layers of polyurethane and 1 carbon layer. Masks do not allow dust particles larger than 2.5 micron, so they reliably protect. The mask should be washed daily under running water with liquid soap.

Hypoallergenic
Period of use: 2 months

Colors: 

bags

filters

EXPENDABLE MATERIALS

ÛLKA Bag

Service life of the bag: 4-5 months.

The bags are designed specifically for hoods of our Ûlka models, but are also suitable for hoods of other manufacturers.

How to use:

- Soak the bag in a disinfectant, leave it for an hour, and then wash and dry it.
- Wash the dust bag with delicate washing in the washing machine or by hands.
- Dust bags cannot be shaken out.

It is recommended to wash the bag after 4-6 customers (change every 3-4 months). DO NOT allow the fan to come into contact with water or other liquids.

Color:

ÛLKA Filter

Replaceable filter for ÛLKA Premium and ÛLKA Hepa manicure extract. It is due to this filter that the hood successfully copes with air purification and removes dust.

It is necessary to wash the filter only in running water; (do not soak or machine wash). It is necessary to clean (shake out) after every 3rd customer, with the help of a thin brush, which will delicately remove all the dust between the folds of the filter.

The filter must be changed every 3 months.

Dimensions: Length: 22 cm / Width: 20 cm / Thickness: 2 cm

Color:

napkins

EXPENDABLE MATERIALS
